

**GURU GOBIND SINGH PUBLIC SCHOOL, CHAS (BOKARO)**

**WEEKLY ASSIGNMENT 17**

**( SESSION 2020-21)**

**CLASS-4**

**DATE:-17.08.20**

**SUBJECT-E.V.S**

**CHAPTER-9,**

**CHAPTER 9- TEETH EARS AND HAIR OF ANIMALS**

**TEXTUAL EXERCISES:-**

**LONG ANSWER TYPE QUESTIONS:-**

**Q.1 Explain any two types of animal teeth?**

Ans.The two types of animal teeth are as follows:-

a.Canine teeth--Carnivores animals have long,sharp and pointed teeth to tear the flesh.

b.Grinding teeth-Carnivores animals have strong grinding teeth to chew flesh and bones

**Q.2 Write a few lines on elephant's ear?**

Ans.Elephants have huge triangular ears.They flap both their ears almost together.This keep their body cool.Elephants in hotter climates have larger ears.African elephants have very big ears to loose their body's heat.Asia is a cooler region in compare to Africa.Therefore,Asian elephants have smaller ears.

**Q.3 Do animals have hairs on their bodies?Explain why?**

Ans Yes ,all animals have hairs covering their bodies .Different animals have different kinds of hair like Fur,whiskers and spines.

Furs-It provides protection to the skin of the animals and keeps their body warm

Eg:-bear

Whiskers-It helps animals to sense or feel things around them.Eg.rat

Spines-It provides protection to the animals from their enemies .Eg porcupine

#### Q.4 How are ears of an owl different from the ears of other birds?

Birds do not have external ears. They use small openings on both the sides of the skull as ears. But owls have a well-developed hearing system. Owl's ears are located on the sides of its head behind its eyes. They are also covered by the feathers of the facial disc. In most of the owls one ear is higher than the other. It helps them in picking up the sound very accurately.

#### **II. Define the following:-**

a. **Carnivores**-Animals that eat flesh of other animals are called carnivores.

Eg-lion, tiger, wolf etc.
